

# QualityMate

**ISO 9001 quality management for construction.**  
**Self-hosted. Australian-built.**

---

Construction sites generate sensitive incident data — injury reports, near-misses, contractor performance. We don't think that should leave your network. QualityMate runs on a single Linux server you control. Your data, your hardware, your audit trail.

## What's included

### Site check-in

Per-job QR posters, on-screen signature, supervisor sign-off. No login required for the worker.

### Incident logging

Phone-first form. Photos. Voice dictation. Offline queue. Optional AI triage.

### Corrective actions

Assign, due-date scans, owner-resolved. Overdue notifications nightly.

### Management reviews

AI pack drafts, attendee sign-offs, director approval, .ics invites, distribution emails.

### Audit-ready

Every state change recorded. Quarterly PDF export. Full ZIP data export.

### Yours forever

One install per company. Open file formats throughout. No vendor lock-in.

# Pricing

One-time licence. Annual support optional. No subscription. No per-seat fees.

## Licence — \$3,500 AUD (one-time)

Perpetual licence for one company.

- All features. No 'Pro' tier.
- Self-hosted Docker image from GHCR.
- Unlimited users, unlimited jobs.
- Full source available to licensees.

## Support — \$600 AUD per year

Email support, business hours AEST.

- Bug fixes and security patches.
- Minor and major version upgrades.
- Release-channel access (`:1-stable-rc` canary).
- Cancel anytime — install keeps running.

## White-glove install — \$750 AUD (one-time)

We provision your server.

- DNS, TLS, reverse proxy, backups configured.
- First admin onboarded.
- QR posters generated for your active jobs.
- One-hour training session for your team.
